

HORSE BIT ADVICE BITTING SERVICE

WHAT TO EXPECT

WHAT WILL HAPPEN AT YOUR BITTING APPOINTMENT

Your consultation takes approximately an hour depending on the horse and riders specific problem or needs.

Double bridle consultations extend to 1 1/2 hours as do two different discipline requirements, for example, Dressage and Showjumping.

STEP 1

Gill will make a pre-ridden assessment - looking at facial conformation of your horse, discussing any concerns or problems that you may be experiencing, and signs of evasion related to the bit.

STEP 2

The horse is then ridden in its normal tack/equipment whilst Gill observes, assessing for signs of evasion. This gives the rider chance to impart as much information and feedback as possible helping to build a picture to assist the Bit change.

STEP 3

Gill and the rider will discuss the key points that need to be addressed and agree a realistic aim of bit change.

STEP 4

Gill will select and explain her bit choice, fit and guide the horse and rider through the transition to the new Bit.

STEP 5

Finally, when Gill and the rider have agreed that an improvement has been achieved Gill's recommendations will be recorded on the Biting form and the rider will be able to source the bit at the best price.
